

# Learning Strategies Course Outline

**Teacher: Mrs. Roberts  
Room 215**

## **COURSE OUTCOMES:**

In Learning Strategies, we will focus on skills necessary to become a more independent learner, creative thinker, problem solver and test taker. We will cover areas such as;

- 1. Understanding yourself as a learner**
- 2. Organizing your school work and course assignments**
- 3. Homework/study skills**
- 4. Practical Applications with current course work**
- 5. Test taking techniques**

Building upon these skills will help you succeed in your academic courses.

## **ASSESSMENT and CONTENT:**

### **Projects and Assignments 75%**

- Assignments, projects, group work, presentations

### **Class organization 15%**

- Using class time wisely, bringing books and material to class, attendance and punctuality, goal setting and goal review

### **Final assignment 10%**

- Creation, presentation and content

Students will create their own goals, the plan to get there and the assessment of the outcome. This course will include some guest speakers, group and independent work.
